General information	Show this Safety Data Sheet to the medical personnel.
Inhalation	Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.
Ingestion	The product will polymerise immediately in the mouth, making it almost impossible to swallow, but beware of possible choking hazard. Ensure breathing passages are not obstructed. Saliva will separate the solidified product from the mouth over a period of hours. Consult a doctor.
Skin contact	If adhesive bonding occurs, do not force skin apart. Rinse immediately with plenty of water. If adhesive bonding occurs, prise the skin apart slowly, working from the edge of the bonded area. Get medical attention immediately.
Eye contact	If adhesive bonding occurs, do not force eyelids apart. Apply a pad soaked in warm water and allow the eyelids to separate. Get medical attention. Consult a physician for specific advice.

4.2. Most important symptoms and effects, both acute and delayed

Inhalation	There may be irritation of the throat and a feeling of tightness in the chest. Exposure may cause coughing and wheezing.
Ingestion	There may be soreness and redness of the mouth and throat. The product will polymerise immediately in the mouth, making it almost impossible to swallow, but beware of possible choking hazard.
Skin contact	Cyanoacrylates bonds skin in seconds, In the case of large spills on the skin, superficial burn may occur - treat accordingly. There may be irritation and redness at the site of contact.
